# Today's Plan

Introducing EBSCO search

Accessing EBSCOhost

Using advanced search options

Sharing content, citations,  
saving options and more

Your suggestions...

# Learn to Create **EBSCO Journal Alert** and automate part of your research

To: [mkolman@ebSCO.com](mailto:mkolman@ebSCO.com)

Subject: **A new issue of "Acta Zoologica" is available.**

Follow the link to the journal contents:

<http://search.ebscohost.com/login.aspx?direct=true&db=asn&AN=133581128&site=ehost-live>

# Learn to Create **EBSCO Search Alert** and automate part of your research

To: [mkolman@ebSCO.com](mailto:mkolman@ebSCO.com)

Alert Run Date: 05/21/2019 02:43:28 AM

Alert Name: **(dogs OR cats) AND ("heart disease" OR "heart failure" OR "cardiac disease" OR "cardiovascular diseases")**

Database: CAB Abstracts 1990-Present

Number of Hits: 23

# EBSCO Search Alert

## Results:

1. **A pilot study investigating circulating trimethylamine N-oxide and its precursors in dogs with degenerative mitral valve disease with or without congestive heart failure.** By: Karlin, E. T.; Rush, J. E.; Freeman, L. M.; **Journal of Veterinary Internal Medicine**; 33(1), Boston:Wiley,2019,46-53

<http://search.ebscohost.com/login.aspx?direct=true&db=lbh&AN=20193188024&site=ehost-live>

2. **Pulmonary artery banding in a cat with a perimembranous ventricular septal defect and left-sided congestive heart failure.** By: Cichocki, B. N.; Dugat, D. R.; Baumwart, R. D.; **Journal of the American Veterinary Medical Association**; 254(6), Schaumburg:American Veterinary Medical Association,2019,723-727

<http://search.ebscohost.com/login.aspx?direct=true&db=lbh&AN=20193159480&site=ehost-live>

3. **Myxomatous mitral valve disease in the miniature poodle: a retrospective study.**  
by: Meurs, K. M.; Adin, D.; O'Donnell, K.; Keene, B. W.; Atkins, C. E.; DeFrancesco, T.; Tou, S.; **Veterinary Journal**; 244 Oxford:Elsevier Ltd,2019,94-97

<http://search.ebscohost.com/login.aspx?direct=true&db=lbh&AN=20193136500&site=ehost-live>

# Sophistication of the Engine Doing the Searching

# EBSCO Relevance Matching Priorities

The system has the following priorities and has no bias toward content from any provider:

1. Match on subject headings from controlled vocabularies
2. Match on article titles
3. Match on author keywords
4. Match on keywords within abstracts
5. Match on keywords within full text

---

**Exact Matches:** Exact matches are favored over partial matches – considering also the field in which those words appear (abstract vs. full text vs. title, etc.)

**Density:** Matches across multiple metadata fields are favored for relevance scoring (more is better). The scoring influence of repeat terms within individual metadata fields is minimized.

# Value Ranking:

## **Recency / Currency**

Recently published content is scored higher for relevance than older content

# Value Ranking: Document Type

**Certain document types are weighted higher than others for relevance scoring, for example:**

“Review articles” are considered valuable

“Book reviews” are not considered valuable

# Value Ranking:

## Document Length

Documents of a more substantial length  
have a heavier weighting

(e.g., **a ¼ page article is considered less valuable** than a 4 page research paper)

A trial of Food Science Source database is accessible on the below mentioned account. The database will be accessible until July 2019.

# CAB Abstracts

- access to **over 9,2 million records** from 1973 onwards, with over 360,000 abstracts added each year
- international coverage, with publications from over **120 countries in 50 languages**
- CAB Abstracts now comes with CABI Full Text which gives users automatic access to over **449,000 \*** **journal articles**, conference papers and reports - 80% of which are not available electronically anywhere else
- each record **hand-selected by our subject specialists** from over 8,000 serials, books and conference proceedings

# CAB Abstracts

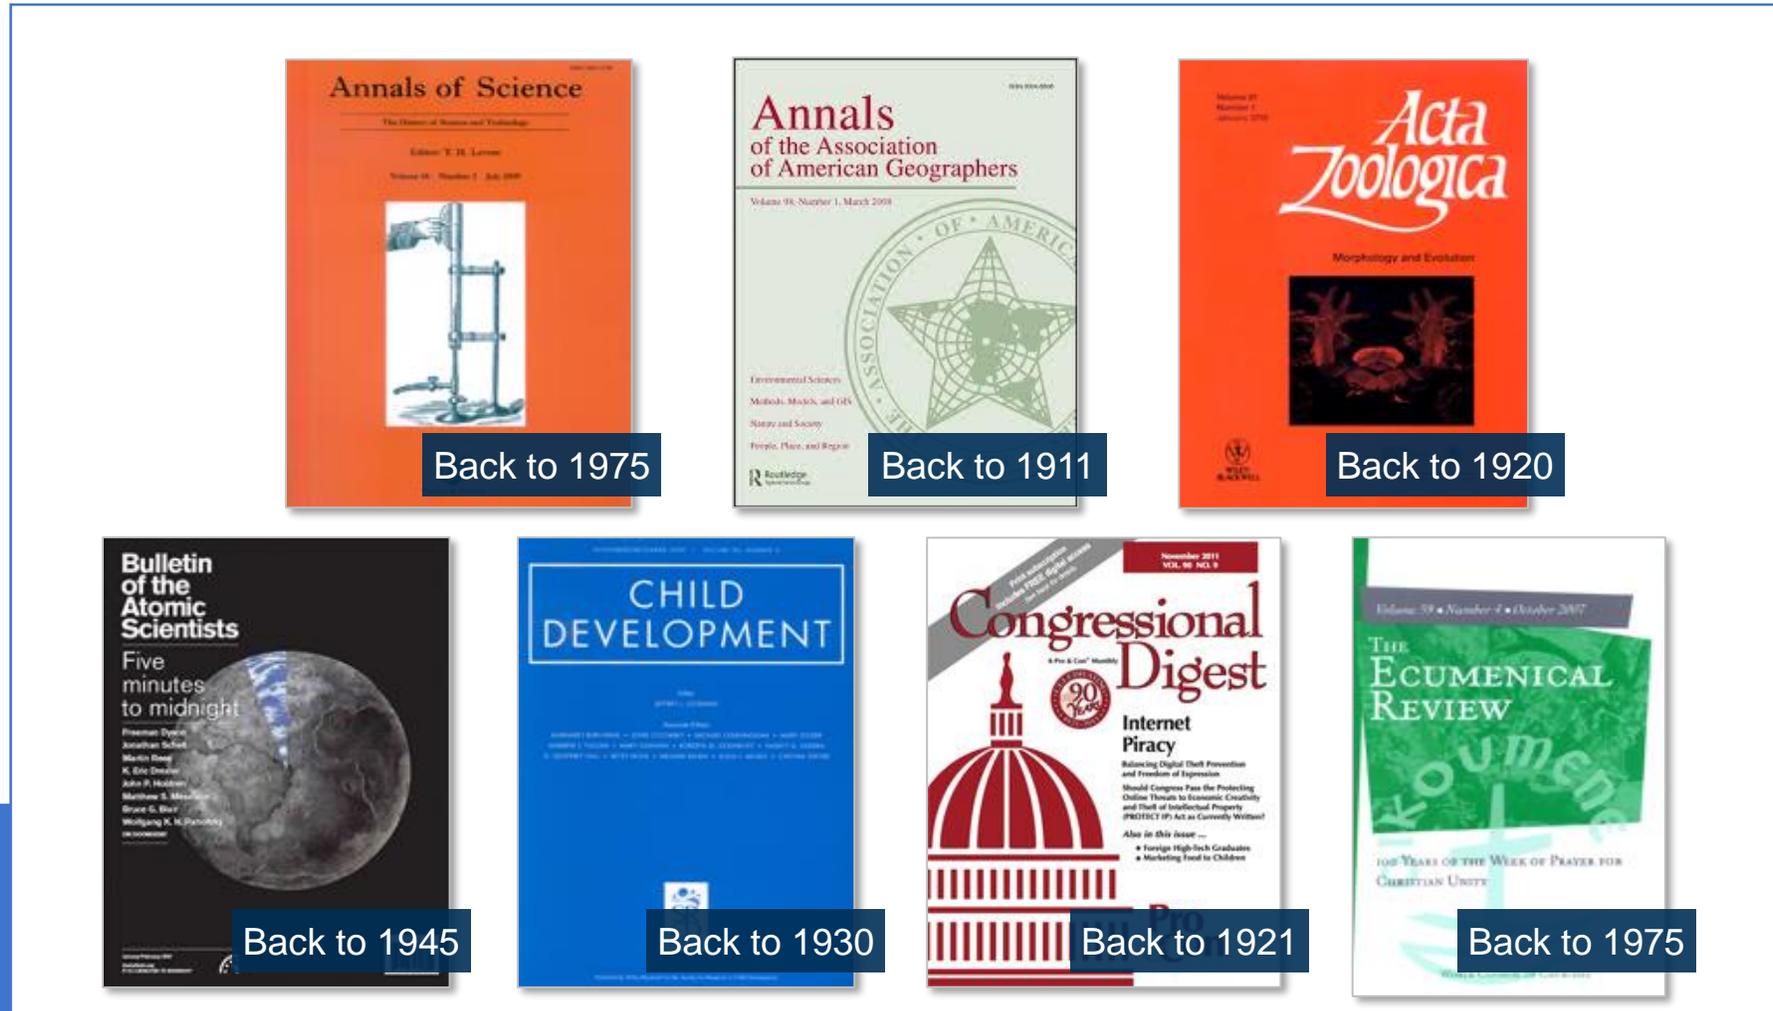

- cover of “**grey literature**”: annual reports, bulletins, conference proceedings, technical information, theses
- constant **up-date** of the content(on weekly bases)
- possibility to add **academic journals from different countries**

# Academic Search Premier

## Active Full-Text Journals

	3,100	2,800	1,300	2,200

# Nearly 150 Journals with Full Text Back to 1975 or Further

# Food Science Source

Covers areas of critical significance to food industry initiatives

**Robots aren't all things to all people, but in the right place can be a big time and labor saver.**

► Wayne Labs, *Senior Technical Editor*

**F**rom a machine builder's point of view, robots can solve many processing/packaging line problems, but at the same time, there are certain applications where conventional equipment performs just as well—if not better. For example, a candy bar packaging line has been making the same bars for years with few changes to the product or the packaging line. Conventional equipment has wrapped the bars and filled the cases for years—so why reinvent the wheel?

But with today's fast-paced and short product life cycles, candy, snack and nutritional bars may be here today and gone tomorrow; their sizes and shapes change, their labels change according to the

article is a new design or changing material, and the number and variety of cases change as well.

"We use robots in packaging factories," says Terry Zarnowski, director of marketing at Schneider Packaging Equipment, Inc. "For us, the robot is nothing highly flexible, repeatable and adapts to get the job done. For our customers, we are getting what they want—flexibility with fast changeover times."

These abilities add up to an increased equipment effectiveness (OEE), we process it bottom line, adds Zarnowski. We used to have had built a come

**Authors:** Labs, Wayne

**Source:** Food Engineering; Aug2013, Vol. 85 Issue 8, p55-62, 6p

**Document Type:** Article

**Subject Terms:** \*MANUFACTURING processes  
\*ROBOTICS  
\*FOOD -- Packaging

**NAICS/Industry Codes:** 327213 Glass Container Manufacturing

**People:** ZARNOWSKI, Terry  
WAGNER, Mike

**Abstract:** The article discusses robotic integration projects in manufacturing and packaging line. Terry Zarnowski, director of sales and marketing at Schneider Packaging Equipment Company, Inc., shares that robots in packaging promote overall equipment effectiveness (OEE). Mike Wagner, global original equipment manufacturer (OEM) business manager/packaging industry of industrial automation provider Rockwell Automation, explains that robots with vision systems aid in addressing variability in product.

# Demo

# Access via KoBSON

The screenshot displays the KoBSON website's navigation and search interface. At the top left is the KoBSON logo. The main navigation bar includes links for KoBSON, INFORMACIJE, NAUKA U SRBIJI, SERVISI, MOŽDA VAM ZATREBA, and SUGESTIJE I ZAMERKE. A search bar with the placeholder 'Tražite' and a magnifying glass icon is located on the right, with additional icons for 'udaljeni pristup', a lock, a refresh icon, a group icon, and 'CPT'. Below the navigation bar is a secondary menu with links: EleČas >, EleKnjige >, Naši u WOS >, Brza stranica >, Pomoć >, and Impresum >. On the far right of this menu are social media icons for Facebook and Twitter, with the text 'Pratite nas:'. The main content area features a 'Publication Finder' section with the EBSCO Discovery Service logo and a search box labeled 'Search EBSCO Discovery Service'. Below the search box is a 'Keyword' dropdown menu and a green 'Search' button. At the bottom of this section are two filter options: 'Full-Text (online)' and 'Peer Reviewed', each with an unchecked checkbox. To the right of the search interface is a promotional banner for 'EBSCO Discovery Service' featuring an icon of a book with a magnifying glass. The banner text describes the service as a unified search tool for content, offering access to over 35,000 journals and 150,000 books, with many available in open access mode. A progress indicator at the bottom of the banner shows five circles, with the first one filled green.
