

# Praktično pretraživanje literature u skladu sa potrebama doktoranata

MA Katarina Perić  
Odeljenje za naučne informacije  
Narodna biblioteka Srbije  
[katarina.peric@nb.rs](mailto:katarina.peric@nb.rs)

04-05. oktobar, 2022.

# Teme:

## Pretraživanje časopisa po naslovu

- (slajdovi 5-11)

## Pretraživanje časopisa po naučnoj disciplini

- (slajdovi 12-20)

## Pretraživanje po temi (ključnim rečima) – pojedinačno i objedinjeno

- (slajdovi 21-57)

## Pretraživanje baza sažetaka i citata (Medline, Scopus, WoS)

- (slajdovi 58-79)

Elektronski časopisi

Kod većine izdavača KoBSON pretplaćuje časopise u punom tekstu od 1997. godine, dok su ranija godišta dostupna do nivoa abstrakta. Predmetna, ili autorska, pretraživanja po člancima, moguće je obaviti:

- (1) na veb stranici izdavača izabranog iz menija, korišćenjem opcije brzo pretraživanje
- (2) na veb stranici izdavača
- (3) na veb stranicama agregatora (EBSCO, ProQuest)
- (4) indeksne baze (Web of Science, Scopus, Scindeks)

### Elektronski časopisi:

Skup pretplaćenih izdavača čiji su naslovi dostupni u formi punog teksta.

## DoiSerbia

- Repozitorijum **55 naslova** domaćih naučnih časopisa sa arhivom punih tekstova od 2002. godine do danas.
- Trenutno broji preko **34.000** članaka opremljenih DOI brojem.

## EBSCO serija vebinara

Predstavnici **EBSCO** informacionog servisa zakazali su nekoliko besplatnih vebinara u septembru. Svi vebinari obrađuju veoma zanimljive teme i namenjeni su kako istraživačima, tako i bibliotekarima. Posebno bismo izdvojili i preporučili svim zainteresovanima da se registruju i prisustvuju sledećim vebinarima:

- "Discover advanced functions of My EBSCOhost Folder" koji je zakazan za sredu, 07. septembra 2022. godine u 9.30 časova ([link za registraciju](#))
- "Tips and tricks in advanced search" koji je zakazan za utorak, 20. septembra 2022. godine u 9.30 časova ([link za registraciju](#))

## Objavljene korekcije impakt faktora za 2021.

Clarivate Analytics je na svojoj stranici objavio **korekcije impakt faktora za 2021**. Postavljena je lista časopisa koja će se ažurirati dva puta nedeljno. Nakon zaključivanja obrade podataka i publikovanja konačnih lista na stranici izdavača, u Journal Citation Reports-u (JCR), mi ćemo ažurirati podatke u EleČas-u.

Podaci publikovani na ovoj stranici (**odjeljak Data Updates u okviru June 28, 2022**) mogu se smatrati zvaničnim JCR podacima.

(objavljeno 06.07.2022.)

### Servisi

U 2016. godini, iz akademskih institucija u Srbiji, dostupno je preko 35.000 naslova stranih naučnih časopisa u punom tekstu, blizu 160.000 naslova knjiga, kao i nekoliko indeksnih baza podataka. Pretraživanje na KoBSON portalu moguće je obaviti samo prema naslovu časopisa ili knjige. Većina časopisa je u punom tekstu dostupna od 1997. godine, dok su ranija godišta dostupna do nivoa abstrakta. Za predmetna pretraživanja po člancima upućujemo Vas ili na nekog od agregatora, ili direktno na sajt izdavača.

**Pretraživanje časopisa:** Spisak svih časopisa koji su na neki način dostupni u bibliotekama Srbije (bilo elektronski, bilo u papirnoj formi), proširena naslovima časopisa koji su imali Impact Faktor u poslednjih dvadeset godina. Prisustvo časopisa na toj listi je samo pokazatelj njegove dostupnosti, a nikako kvaliteta.

**Objedinjena pretraga svih servisa:** Pretraga se vrši preko servisa EBSCO Discovery, u okviru forme za pretragu na početnoj stranici KoBSON sajta, kao i odabirom opcije EBSCO Discovery Service na EBSCO platformi.

**Elektronski časopisi:** Skup pretplaćenih izdavača čiji su naslovi dostupni u formi punog teksta.

Podaci o časopisu

## Podaci o časopisu

ISSN	0022-0000
Naslov	Journal of Computer and System Sciences
Status	Active
Tip dokumenta	Academic/Scholarly
Učestalost	8 times a year
Jezik	Text in English
Prvi broj	1967
Abstrakt	Publishes original research papers on computer science and in system science, with emphasis on pertinent mathematical theory and its applications.
Alternativni naslovi	Online - full text edition; ISSN 1090-2724

## U bibliotekama Srbije (u COBISS-u)

Od - do	Biblioteke	Brojevi telefona
1984-1993	Institut "Mihajlo Pupin", BEOGRAD	2755-171, 2776-222 lok 309
1984-1988	Institut za nuklearne nauke "Vinča", Beograd	011/3408-758, 3408-547, 6308-518

## Elektronski dostupan

Servis	Link	Primedba
ScienceDirect	Pretraga po servisu	

## Impakt faktor, kategorije

Impakt faktor (IF)	Kategorije i pozicije časopisa u prethodnim godinama
Kategorije	Computer Science, Hardware & Architecture (49/53)
	Computer Science, Theory & Methods (78/110)
U Current Contents	Engineering, Computing & Technology;
Science Citation	SCIE

## Embryonic Stem Cells/Induced Pluripotent Stem Cells

EMBRYONIC STEM CELLS/INDUCED PLURIPOTENT STEM CELLS

**Concise Review: Induced Pluripotent Stem Cell-Based Drug Discovery for Mitochondrial Disease**

Gizem Inak, Carmen Lorenz, Pawel Lisowski, Annika Zink, Barbara Mlody, Alessandro Prigione

First Published: 22 May 2017 Vol: 35, 1655-1662 | DOI: 10.1002/stem.2637

Abstract | Full Text (HTML) | PDF (381.4KB) | References

Once induced pluripotent stem cells (iPSCs) have been derived from mitochondrial patients, isogenic controls can be generated using genome editing technologies. Correcting the mutations is, however, currently very challenging in the case of mtDNA. The choice of an effective neural cell model is critical for enabling the establishment of high-throughput compound screenings. The screenings can be developed based on targets that

are already known or on cellular phenotypes that are identified using the iPSC-derived neural cells. After the screenings, several validation steps using various methods and model systems are necessary before being able to propose any compound as a treatment, leading to a personalized strategy for drug discovery of neurological mitochondrial disease.

# HTML vs. PDF

10<sup>4</sup> live CD117+ per fetus at a gestational age of 13-14 days (E13-E14; term E21) [1].

An increasing number of publications describe AFSC isolation using culture conditions alone (no CD117 selection at any stage). In the majority of these studies, amniocytes are plated in tissue culture-treated dishes in high-serum media (DMEM, with 10%-20% FBS, with or without basic fibroblast growth factor/FGF-2) [29], and cells have largely mesodermal potential (i.e., they can generate adipogenic, chondrogenic, osteogenic, and myogenic lineages; likely to be AFMSC) [1, 30], although some authors have reported multi-lineage differentiation potential not restricted to mesoderm (including neural differentiation, as well as embryoid body formation) [31-35]. In other cases, it has been observed that cells with similar potentials to AFSC can be derived using precise culture methodology but without positive selection [25, 27]. AFSC, derived by positive selection or by expansion conditions, have a cellular phenotype that is between ESCs and adult mesenchymal stem cells (MSC; see Cellular Characteristics and Fig. 1 below) [17]; this is in contrast to other amniotic fluid-derived cells with a purely mesenchymal phenotype [29], with obvious implications regarding potential regenerative medicine applications. For the rest of the present review, we will focus our discussion on CD117+ AFSC only.

Figure 1.

[Open in figure viewer](#) | [Download Powerpoint slide](#)

AFSC have an intermediate cellular phenotype between ESCs/iPSC and MSC. This is supported by expression of both markers/transcription factors of pluripotency and mesenchymal commitment, as well as their broadly multipotent nature (ability to

## Myeloma Propagating Cells, Drug Resistance and Relapse

ANASTASIOS KARADIMITRIS,<sup>a,b</sup> ARISTEIDIS CHAIDOS,<sup>a,b</sup> VALENTINA CAPUTO,<sup>a</sup> KATERINA GOUDENOU,<sup>a</sup> KANAGARAJU PONNUSAMY,<sup>a</sup> XIAOLIN XIAO<sup>a</sup>

**Key Words.** B lymphocytes • Cancer • Cancer stem cells • Stem cell plasticity • Xenotransplantation • Hematologic malignancies • Flow cytometry • Epigenetics

**ABSTRACT**

Multiple myeloma (MM) is an incurable tumor of the plasma cells, the terminally differentiated immunoglobulin secreting B lineage cells. The genetic make-up of MM has been extensively characterized but its impact on the biology of the disease is incomplete without more precise knowledge of the identity and functional role of cells with multiple myeloma propagating activity (MMPA). We review here recent data that link MMPA with myeloma clonal populations organized in a cellular hierarchy that mirrors normal B cell development and also with drug resistance and disease relapse. We further propose a conceptual framework which, with optimal use of recent technological advances in genomics and phenomics, could allow dissection of the cellular and molecular properties of cells with MMPA, drug resistance and in vivo relapse in an integrated and patient-specific manner. There is real hope that these approaches will significantly contribute to further improvements in disease control, overall survival, and possibly cure of patients with MM. *STEM CELLS* 2015;33:3205-3211

**SIGNIFICANCE STATEMENT**

In this review article we attempt to provide an integrated view of the data that link multiple myeloma propagating cells (MMPA) with drug resistance and disease relapse. We also provide a blueprint for a tri-dimensional study of MMPA and drug resistance in myeloma patients i.e., diagnosis vs remission/relapse; bone marrow vs distant disease and within the cellular architecture of the tumour itself by utilizing the unprecedented power of the new high throughput technologies. It is hoped that such approaches will contribute in the more in-depth understanding of the mechanisms that sustain survival and growth of myeloma cells and will identify new therapeutic targets.

Received May 12, 2015; accepted for publication July 16, 2015; first published online in *STEM CELLS EXPRESS* August 25, 2015.

### Servisi

U 2016. godini, iz akademskih institucija u Srbiji, dostupno je preko 35.000 naslova stranih naučnih časopisa u punom tekstu, blizu 160.000 naslova knjiga, kao i nekoliko indeksnih baza podataka. Pretraživanje na KoBSON portalu moguće je obaviti samo prema naslovu časopisa ili knjige. Većina časopisa je u punom tekstu dostupna od 1997. godine, dok su ranija godišta dostupna do nivoa abstrakta. Za predmetna pretraživanja po članicima upućujemo Vas ili na neolog od agregatora, ili direktno na sajt izdavača.

**Pretraživanje časopisa:** Spisak svih časopisa koji su na neki način dostupni u bibliotekama Srbije (bilo elektronski, bilo u papirnoj formi), proširena naslovnima časopisa koji su imali Impact Faktor u poslednjih dvadeset godina. Prisustvo časopisa na toj listi je samo polozajevi njegovog dostupnosti, a nikako kvaliteta.

**Objedinjena pretraga svih servisa:** Pretraga se vrši preko servisa EBSO Discovery, u okviru forme za pretragu na početnoj stranici KoBSON sajta, kao i odabirom opcije EBSO Discovery Service na EBSO platformi.

**Elektronski časopisi:** Skup preplaćenih izdavača čiji su naslovi dostupni u formi punog teksta.

Izdavači:

- American Chemical Society
- American Physical Society
- American Psychological Association / APA
- ASME Transaction Journals

## Poput na troškove publikovanja radova u OA časopisima izdavača Brill

Međunarodni konzorcijum EIFL (Electronic Information for Libraries), čiji smo član, je potpisao sporazum sa izdavačkom kućom Brill koji omogućava istraživačima iz Srbije popust u iznosu od 50% na troškove objavljivanja rada (APC) u 314 časopisa ovog izdavača. Sporazum važi do kraja 2022. godine. Sistem automatski prepoznaje autore iz Srbije na osnovu navedene afilijacije i nije potrebno uputiti nikakav dodatni zahtev nakon što je rad prihvaćen za objavu.

Lista časopisa se nalazi na sledećem linku.  
Na stranici eIFL-a dostupne su detaljnije informacije u vezi sa publikovanjem rada.

(objavljeno 21.10.2020.)

## Poput na troškove publikovanja radova u OA časopisima izdavača World Scientific Publishing

Međunarodni konzorcijum EIFL (Electronic Information for Libraries), čiji smo član, je potpisao sporazum sa izdavačkom kućom World Scientific Publishing koji omogućava istraživačima iz Srbije popust u iznosu od 50% na troškove objavljivanja rada (APC) u 111 časopisa ovog izdavača (110 hybrid OA i jedan Gold OA). Sporazum važi do kraja 2022. godine i važno je da autori, nakon što je njihov rad prihvaćen, napomenu da ispunjavaju uslov za popust. Za sve neodlučice i pomoć mogu se obratiti na sledeću mejl adresu: [openaccess@wspc.com](mailto:openaccess@wspc.com).

Lista časopisa se nalazi na sledećem linku.

## Open Access Week 2020

"Open with Purpose: Taking Action to Build Structural Equity and Inclusion" tema je 13. po redu međunarodne nedelje otvorenog pristupa koja će trajati od 19.10. do 25.10.2020. godine. Iako donatori, univerziteti, izdavači i naučnici daju veliki doprinos otvorenoj nauci, i ovododnja tema još više naglašava njenu važnost i svrhu. Kako bi otvoreno postalo podrazumevano neophodno je kritički i aktivno angažovanje institucija. Organizator ove manifestacije je SPARC (The Scholarly Publishing and Academic Resources Coalition) - globalna koalicija posvećena otvaranju podrazumevano vrednosti za istraživanje i obrazovanje.

Više informacija nalazi se na zvaničnom sajtu manifestacije [www.openaccessweek.org](http://www.openaccessweek.org), dok na portalu OpenAIRE možete pronaći listu organizovanih webinarata zakazanih za celu nedelju.

(objavljeno 16.10.2020.)

## Još jedan časopis iz Srbije referisan u bazi Scopus

Domaći časopis Applied Engineering Letters ISSN 2466-4677 počeo je da se referiše u bazi Scopus izdavača

# Servisi po disciplinama

# Agregatori i izdavači

## Dostupni izdavači:

- AC, AP, CU, EM, IOP, OX, SG, SD, SP, WI, ASME, RSC
- puni tekstovi članaka često dostupni el. pre njihovog štampanja u papirnoj formi

## Dostupni agregatori:

- EB, FM, HE, HW, JS, TE
- baze koje sadrže časopise više izdavača, često sadrže “embargo” period 3, 6 ili 12 meseci

# Bulovi operatori

AND	Finds documents containing all of the specified words or phrases. Peanut AND butter finds documents with both the word peanut and the word butter.
OR	Finds documents containing at least one of the specified words or phrases. Peanut OR butter finds documents containing either peanut or butter. The found documents could contain both items, but not necessarily.
AND NOT	Excludes documents containing the specified word or phrase. Peanut AND NOT butter finds documents with peanut but not containing butter. NOT must be used with another operator, like AND.
NEAR	Finds documents containing both specified words or phrases within 10 words of each other. Peanut NEAR butter would find documents with peanut butter, but probably not any other kind of butter.
*	The asterisk is a wildcard; any letters can take the place of the asterisk. Bass* would find documents with bass, basset and bassinet. You must type at least three letters before the *. You can also place the * in the middle of a word. This is useful when you're unsure about spelling. Colo*r would find documents that contain color and colour.

eBook Academic Collection (EBSCOhost)

This growing subscription package contains a large selection of multidisciplinary eBook titles representing a broad range of academic subject matter, and is a strong complement for any academic collection. The breadth of information available through this package ensures that users will have access to information relevant to their research needs.

[More Information](#)

Academic Search Premier

This multi-disciplinary database provides full text for more than 4,600 journals, including full text for nearly 3,900 peer-reviewed titles. PDF backfiles to 1975 or further are available for well over one hundred journals, and searchable cited references are provided for more than 1,000 titles.

[Title List](#) [More Information](#)

CAB Abstracts 1990-Present

CAB Abstracts (1990 to Present) covers the significant research and development literature in fields of agriculture, forestry, aspects of human health, human nutrition, animal health, as well as the management and conservation of natural resources. This database offers abstracts and indexing for journals, serial publications, conference proceedings, books, theses, annual reports, patents & standards and dates back to 1990. Coverage is international in scope.

A second article, **127. Steering Evolution with Sequential Therapy to Prevent the Emergence of Bacterial Antibiotic Resistance.**, is also visible with its abstract and subjects: DRUG resistance in bacteria; THERAPEUTIC use of antibiotics; PUBLIC health; MARKOV processes; RANDOM walk; (Mathematics); Health and Welfare Funds. HTML Full Text (circled in red) and PDF Full Text (0790t) are available.

Title: Antibiotic resistance: what can we do? By: Warren, Ed, Practice Nurse. 09536612, Jan2016, Vol. 46, Issue 1  
Database: Business Source Premier

**Antibiotic resistance: what can we do?**

When we think of antibiotic resistance, we often think of superbugs causing common infections. But the problem is far more widespread, with high levels of resistance in bacteria causing common infections. Respiratory and sexually transmitted infections: but is there anything that we in primary care can do to prevent the arrival of a post-antibiotic era?

As we lurch along in the 21st Century, when the biggest UK killers are cancer and ischaemic heart disease, it is hard to appreciate the role that infectious diseases played before the middle of the 20th Century. Certainly cancer and heart disease existed, but it was infections that frightened people. Industrialisation brought outbreaks of cholera and typhoid to the squalid urban poor. Before that, waves of plague swept the country, and indeed Europe, at regular intervals, with mortality rates that almost defy belief. But perhaps the most telling example of historical killer infections was tuberculosis (TB).

Though accurate records are difficult to acquire, it is believed that TB killed one-third of all those who died in Britain between 1800 and 1850.1 Furthermore it targeted young adults, people who would otherwise be economically active and bringing up children. Like many infectious diseases, the outlook for succumbing to TB improved markedly with improved social conditions and hygiene, but another significant contribution was made by the discovery of drugs that would kill the causative mycobacterium. This was a triumph for science and social progress: in 1913 there were 120,000 cases of TB notified in England and Wales and 39,000 deaths (from a rather smaller national population, and at a time when notification was probably less complete), but by 2013 there were only 7,400 cases notified and 280 deaths.2 However, the 2013 figure is not zero and one important reason for this is the emergence of strains of the TB bacillus which are resistant to multiple antibiotics. If, or more probably when, other seriously nasty infections follow the same pattern (and there is plenty of evidence that this is already happening) we will again face the awful prospect of dealing with waves of incurable infectious diseases. The stakes are really that high.

**THE SCALE OF THE PROBLEM**  
It has been apparent for some years that resistance to the antibiotics generally used in the treatment of bacteria is becoming more common (it is, of course, the bacteria which acquire resistance, not individual patients). Public Health England estimates that by 2050, antimicrobial resistance (AMR) will cost the global economy \$100 trillion. This also translates into 10 million deaths globally.3 AMR is truly an international concern as infectious diseases are these days concentrated in less economically developed countries, countries that also are going to be less able to pay the costs. The World Health Organization4 is deeply concerned about AMR, stating: "Without urgent, coordinated action, the world is heading towards a post-antibiotic era, in which common infections and minor injuries, which have been treatable for decades, can once again kill." (Box 1) (Pedantic note: antimicrobial resistance refers to resistance to antibiotics, but also to anti-fungal and anti-viral drugs. As antibiotics are used much more in primary care than the other two categories, this article focuses on antibiotics).

## TEEAL

### TEEAL

<a href="#">iz akademske institucije</a>	<a href="#">udaljeni pristup</a>
(podešavanje Proxy servera)	(o pristupu 'od kuće')

### O TEEAL (The Essential Electronic Agricultural Library) bazi

TEEAL je elektronska baza podataka koja sadrži preko 560 naslova časopisa od preko 90 izdavača iz oblasti agrikulture. Pretražive su agrikulturna ekonomija, poljoprivredna tehnika, agronomija, usevi i nauka o zemljištu, entomologija, upravljanje prirodnim resursima, šumarstvo, upravljanje poljoprivredom, ishrana i nauka o hrani, biljna patologija, ruralni razvoj, održiva poljoprivreda, veterina i slične nauke i discipline.

### Kratko uputstvo o pretraživanju baze

Bazu je moguće pretraživati po temi ili ključnim rečima, pri čemu se pretraga termina vrši u naslovu, autorima i sažetku. Ako želite konkretnu pretragu po naslovu, autoru ili sažetku izaberite odgovarajuću stavku iz padajuće liste.

Takođe je omogućeno i napredno pretraživanje – pretraživanje po više različitih kriterijuma istovremeno - po zadatoj temi ili autoru, sa ograničavanjem na pojedinu godinu i/ili na pretraživanje samo u okviru jednog naslova časopisa. Izborom pojedinačnog naslova časopisa dobija se lista svih radova objavljenih od 1993. godine, – izlistanih obrnuto-hronološki – od najnovijih ka starijim godištima, ali se pretraživanje može ograničiti i na samo jednu godinu.

Naslov	Environmental life cycle assessment of cereal and bread production in Norway
Autor(i)	Korsaeth-A, Jacobsen-A-Z, Roer-A-G, Henriksen-T-M, Sonesson-U, Bonesmo-H, Skjeltvåg-A-O, Strømman-A-H
Abstract	We assessed the environmental impacts of producing bread, as delivered to the consumer, assuming the use of Norwegian ingredients only. Ten impact categories, including global warming potential (GWP), were quantified by mixed modelling and life cycle assessment. Firstly, we quantified the impacts of growing barley, oats, winter and spring wheat on 93 farms that were representative of the main cereal production regions in Norway. We used wide system boundaries, which included all relevant processes occurring both pre-farm and on-farm. Secondly, we assessed a representative production chain for bread, including transport, milling, baking and packing processes. On-farm processes accounted for a large share of the environmental impacts attributable to the production of bread (e.g. 50% for GWP). There is thus considerable potential for environmental improvements through changes in farm management. In total, the GWP per kg of bread (freshweight) was 0.95 kg CO <sub>2</sub> -equivalent. The environmental footprint of transport was small.

## Indeksne baze

Indeksne baze podataka sadrže bibliografske podatke o radovima iz časopisa koji su u njima zastupljeni. Za svaki članak dati su detaljni podaci:

- autor rada i institucija
- naslov rada
- naziv časopisa
- godina
- jezik rada
- tip rada
- sažetak

Ukoliko zapis obuhvata i popis korišćene literature, takve baze nazivamo citatnim (Web of Science, Scopus, Srpski citatni indeks).

### MEDLINE

Izdavač: US National Library of Medicine (NLM)

[pristup MEDLINE-u](#)

### O bazi

MEDLINE je vodeća svetska bibliografska baza iz oblasti biomedicinskih nauka. Dostupna je besplatno.

Pored bibliografskih podataka o svakom članku iz preko 5.000 časopisa, uspostavljen je i link do punog teksta. Dostupnost članka u punom tekstu uslovljena je pretplatom na elektronsku verziju časopisa (preko KoBSON-a ili na neki drugi način).

Svaki članak se indeksira odrednicama iz kontrolisanog terminološkog tezaurusa Medical Subject Headings - MeSH (<http://www.nlm.nih.gov/mesh/meshhome.html>), koji obuhvata preko 24.500 odrednica uređenih hijerarhijski na devet nivoa.

## Alert

### Korišćenje Alert opcije

Izdavači naučnih baza podataka pružaju registrovanom korisniku mogućnost korišćenja *Alert* servisa. Ta opcija Vam omogućava da sačuvate korišćene upite kako biste ih kasnije ponovo izvršavali. Osim toga, možete ih koristiti kao zahtev za periodično slanje izveštaja o novodotatim člancima koji odgovaraju tim upitima.

Da biste koristili ovu pogodnost neophodno je da korisnik otvori svoj lični nalog (registruje se) na svakom servisu pojedinačno. Te registracije su besplatne i međusobno nezavisne i nemaju nikakve veze sa KoBSON nalogom.

Postoji nekoliko tipova Alerts obaveštenja:

1. *Search Alerts* – obaveštenja vezana za pretrage. Ako korisnik odluči da sačuva određenu formu i sadržinu pretrage (npr. konkretnu konfiguraciju ključnih reči i imena autora po kojima je pretraživao bazu, slika ispod), ima mogućnost da putem Alerts aplikacije konfiguraciju konkretne pretrage sačuva, a da mu servis automatski šalje obaveštenje na e-mail adresu kada god se u bazi pojavi neki novi članak koji odgovara kriterijumima pretrage.
2. *Volume/Issue Alerts* – obaveštenja vezana za nove brojeve i sveske časopisa. Korisnik može da izabere časopise za koje želi da dobija obaveštenja kada god izađe nova sveska časopisa, naravno pod uslovom da se taj časopis referiše u bazi.
3. *Citation Alerts* – obaveštenja vezana za citiranje izabranih članaka. Korisnik može da traži da mu se za određene članke šalju obaveštenja kada god se u bazi pojavi neki novi rad koji citira izabrani članak.

# Možda Vam zatreba - RSS

The image shows a screenshot of the KoBSON website's navigation menu. The logo 'KoBSON' is on the left. The main navigation bar includes: KoBSON, INFORMACIJE, NAUKA U SRBIJI, SERVISI, MOŽDA VAM ZATREBA (highlighted with an orange oval), and SUGESTIJE I ZAMERKE. Below this is a secondary menu with: Google alati, Intelaktualna prava, Razrešavanje, Creative Commons (CC), Čemu služi (highlighted with an orange oval), Deep Web Technologies, Vrednovanje, Open Access, and Predatorski časopisi. A horizontal bar contains links: EleČas >, EleKnjige >, Naši u WOS >, Brza stranica >, Pomoć >, Impresum >, and Pratile nas: with social media icons. The breadcrumb trail reads: Početak / MOŽDA VAM ZATREBA / Čemu služi. The 'RSS' link is highlighted with an orange oval. The main content area is divided into two columns: 'Šta je RSS?' and 'Korisni linkovi'.

Početak / MOŽDA VAM ZATREBA / Čemu služi

**RSS**

## Šta je RSS?

RSS (Really Simple Syndication) predstavlja aplikaciju za automatsko preuzimanje podataka sa internet sajtova. Uz pomoć RSS aplikacija moguće je pratiti promene na web lokaciji od interesa bez posećivanja samog sajta. RSS automatski preuzima podatke o promenama na sajtu i obaveštava korisnika o njima. Ako se na sajtu pojavi neka nova vest, tekst ili neki drugi sadržaj, korisnik dobija informaciju o tome.

Postoje dva preduslova da bi RSS funkcionisao:

1. Da web sajt ima RSS aplikaciju, tj. da je moguće preuzimati informacije na ovaj način sa njega.
2. Da korisnik ima aplikacije za čitanje RSS-a, kao i da određenu web lokaciju unese u listu sajtova za RSS informacije.

Ove aplikacije se mogu besplatno preuzeti sa Interneta.

Za istraživača koji želi da prati određene naučne časopise u elektronskoj formi (npr. preko KoBSON-a), RSS predstavlja odlično rešenje, jer se sve promene, tj. pojavljivanje novog broja i novih tekstova, automatski detektuju i informacija stiže direktno korisniku, štedeći na taj način njegovo vreme.
