О бази података SCOPUS

- Укључује апстракте и референце из 14.000 наслова и преко 4.000 издавача
- Омогућава повезивање са пуним текстом чланка, уколико је плаћен приступ
- Укључује и резултате претраживања светске мреже преко претраживача SCIRUS

О бази података SCOPUS

- 15 000 индексираних ресурса
- 27 милиона докумената
- 245 милиона цитираних референци
- 13 милиона патената
- 250 милиона докумената на вебу

Број часописа по областима

- 4 500 часописа из области хемије, физике, математике и техничких наука
- 5 900 из области медицине
- 2 700 из друштвених наука
- 2 500 из биолошких и биотехничких наука

Особине Scopus-а

- постоји око 90 % преклапања што се тиче самих часописа ако се Scopus упореди са Web of Science (WOS)
- Scopus је повезан са Elsevier-ovim претраживачем Scirus
- Основно претраживање
- Напредно претраживање
- Author search

Citation Tracker

- Омогућује праћење цитираности аутора или изабраних чланака на одређену тему
- Даје табеларни преглед цитата изабраног аутора по годинама
- Омогућује претраживање цитиране литературе

Citation Tracker

- Опцијом *exclude autocitations* можете искуључити самоцитате
- Листу можете сачувати у *My profile* кликом на опцију *Save the list*
- **ЛИСТУ МОЖЕТЕ ПОНОВО КОРИСТИТИ ЗА ДОПУНУ ПОДАТАКА ПОСЛЕ НЕКОГ ВРЕМЕНА ПОЗИВАЊЕМ ЛИСТЕ ИЗ *My profile***

Citation Tracker

- Могуће је истовремено процесирати 550 докумената
- Могуће је приказати, штампати или послати електронском поштом само до 200 докумената одједном
- Да би креирали и чували своју листу морате да се региструјете лично (да изаберете корисничко име и лозинку и дате своју e-mail адресу)

Citation Tracker

Када добијете листу цитата траженог аутора, добијате и могућност да је сузите ограничавајући се на (*limit to*) или искључујући (*exclude*) поједине наслове часописа, ауторе, године издања, типове радова или научне области.

То је веома корисно када у бази има више аутора са истим презименом и иницијалима.

Citation Tracker

Листу можете средити као библиографију по различитим стандардима за библиографски опис који су у употреби у науци, што је такође веома корисно.

Сређену листу можете штампати, копирати у MS Word, послати меилом или експортирати у ASCII формату или формату за унос у комерцијане софтвере за базе података.

ПРАЋЕЊЕ ЦИТИРАНОСТИ

- Праћење цитираности новијих радова објављених у часописима које покрива SCOPUS је релативно једноставно.
- Редовна допуна података о цитираности је веома једноставна.
- Могуће је праћење цитираности радова из одређене области.

ПРАЋЕЊЕ ЦИТИРАНОСТИ

Пошто је израда библиографије цитираних радова на основу базе података **SCOPUS** далеко компликованија него ако се ради на основу **Web of Science**,
не препоручујем вам да прихватате да то радите за истраживаче.

Резултати претраживања

Број цитата WOS	Број цитата Scopus -tracker	Број цитата Scopus refauth	Цитати само из WOS-а	Цитати само из Scopus -а	Укупно цитата	Прекла пање цитата	
66 (72,5%)	84 (92,3%)	67	7 (7,7%)	25 (27,5%)	91 (100%)	59 (64,8%)	

НЕПРЕЦИЗНА ЦИТИРАНОСТ

Истраживачима можете показати како да раде или пратити за њих цитираност њихових новијих радова, али им нагласите да праћење цитираности у овој бази података служи првенствено за успостављање контаката између научника који се данас баве сродном тематиком, а не за библиометријске анализе.

Хвала на пажњи !
