Publons Transparent Peer Review

For over 2 years, **Publons** has linked up with a number of publishers, to put into place the first automated, scalable, **transparent peer review workflow**.

The model...

- Is scalable and robust
- Requires minimal work from the publisher
- Is a simple process for researchers
- Provides reviewers, authors and editors a 360° view of their contribution
- Is GDPR compliant

Web of Science Reviewer Locator for Publishers

Reliably find, screen, and connect with the right experts to carry out reviews.

Optionally, incentivise peer reviewers with recognition for their efforts on Publons and provide a better reviewing experience.

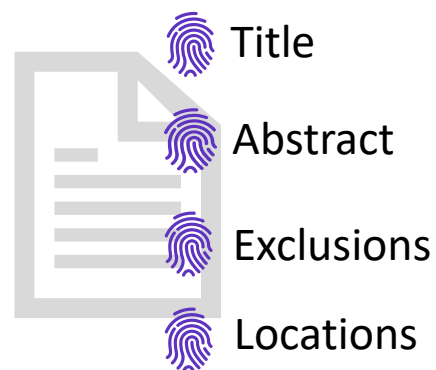

Web of Science Reviewer Locator

How it works

Web of Science Reviewer Locator has a robust and comprehensive processes in alignment with GDPR and procedures in place to ensure that data remains secure.

Learn more here:
<https://publons.com/about/terms>

- Algorithm matches application to top relevant papers in last 3-5 years

Web of Science Core
Collection 80m+
publications

- Top matching authors extracted from top papers

Web of Science Core
Collection 10m+ Author
Records

- Author affiliation history, country, keywords, etc. retrieved
- Potential organizational and co-author conflicts flagged

Up to 100 reviewer
recommendations

- Verified peer reviewer record
- Link to 360° researcher profile

Publons Reviewer Network

- 2m+ researchers
- 800k+ reviewers
- 10m+ verified reviews

Web of Science Reviewer Locator

Building a search

- Add a title and an abstract, to define the search terms used by the algorithm.
- If there are authors that you wish exclude from the results, add them in this section.
- These will also be used to highlight possible conflicts with the results.
- If you wish to exclude particular reviewers, these can be added.
- Filter to include or exclude countries.

Pre-operative Nutrition Support in Patients Undergoing Gastrointestinal Surgery

Abstract / summary *

Post-operative management in gastrointestinal (GI) surgery is becoming well established with 'Enhanced Recovery After Surgery' protocols starting 24 hours prior to surgery with carbohydrate loading and early oral or enteral feeding given to patients the first day following surgery. However, whether or not nutritional intervention should be initiated earlier in the preoperative period remains unclear. Poor pre-operative nutritional status has been linked consistently to an increase in post-operative complications and poorer surgical outcome.

Authors / applicants (2)

List authors / applicants to prevent them from appearing as recommendations and to enable automated flagging of potential conflicts of interest.

Web of Science Reviewer Locator

How possible reviewers are found

- We search the Web of Science for researchers with expertise in the relevant subject area.
- Once a large pool of potential reviewers is identified, reviewers are ranked, taking into account a number of factors, such as:-
 - The 'similarity' of the recommended reviewer's published articles to the application content.
 - The total number of articles published by the recommended reviewer and their citation count.
 - The recommended reviewer h-index.
 - Whether we found a recent email address for the recommended reviewer.
 - Whether the recommended reviewer is a Publons user. (This does not mean a Publons user will be ranked above a non-Publons user - we maintain a careful balance).
 - **Coming soon:** whether the recommended reviewer has already reviewed for the publisher.

The screenshot displays the 'Recommended Reviewers' section of the Web of Science Reviewer Locator. It features a search bar at the top with the text 'Download results' and 'Items per page: 10' and '1 - 10 of 29'. Below this, four reviewer profiles are listed, each with a 'Contact' button and a 'Remove' button. The profiles are:

- Atkinson, Charlotte:** 75 articles. Relevant Publications include 'Early Enteral Nutrition Within 24 Hours of Lower Gastrointestinal Surgery Versus Later Commencement for Length of Hospital Stay and Postoperative Complications' (2018) Cochrane Database of Systematic Reviews (12 citations) and 'Immunonutrition for Patients Undergoing Surgery for Head and Neck Cancer' (2018) Cochrane Database of Systematic Reviews (5 citations). Keywords: Postmenopausal women, Equol, Isoflavones, Breast-cancer risk, Isoflavone, Breast-cancer, Premenopausal women, O-desmethylangolensin, Daidzein, Soy.
- Burden, Sorrel:** 65 articles | 1 reviews. Relevant Publications include 'Perioperative Nutrition for the Treatment of Bladder Cancer By Radical Cystectomy' (2019) Cochrane Database of Systematic Reviews (0 citations) and 'Interventions to Reduce Acute and Late Adverse Gastrointestinal Effects of Pelvic Radiotherapy for Primary Pelvic Cancers (review)' (2018) Cochrane Database of Systematic Reviews (12 citations). Keywords: Quality-of-life, Risk, Cancer, Nutrition, Malnutrition, Qualitative, Surgery, Randomized controlled-trial, Impact, Body-composition. Peer Review Experience: Health & Social Care in the Community (1 review).
- Thomas, Steven J.:** 48 articles. Relevant Publications include 'Early Enteral Nutrition Within 24 Hours of Lower Gastrointestinal Surgery Versus Later Commencement for Length of Hospital Stay and Postoperative Complications' (2018) Cochrane Database of Systematic Reviews (12 citations) and 'Immunonutrition for Patients Undergoing Surgery for Head and Neck Cancer' (2018) Cochrane Database of Systematic Reviews (5 citations). Keywords: Survival, Quality-of-life, Head and neck cancer, Smoking, Clinical-trial, Human-papillomavirus, Head, Reconstruction, Oral cancer, Oncology.
- Calder, Philip C.:** 669 articles. Relevant Publications include 'Immunonutrition for Acute Respiratory Distress Syndrome (ARDS) in Adults' (2019) Cochrane Database of Systematic Reviews (18 citations) and 'Preconception Maternal Iodine Status is Positively Associated with IQ But Not with Measures of Executive Function in Childhood' (2018) Journal of Nutrition (15 citations). Keywords: Eicosapentaenoic acid, Inflammation, Fish oil, Polyunsaturated fatty-acids, Docosahexaenoic acid, Fish-oil, Tumor-necrosis-factor, Supplementation, Cytokine, Alpha-linolenic acid.

Web of Science Reviewer Locator Integration with your systems

The Web of Science Reviewer Locator has already been designed to integrate with the following editorial management systems:-

- ScholarOne Manuscripts
- Editorial Manager
- eJournal Press
- Benchpress
- Manuscript Manager

The screenshot displays the Web of Science Reviewer Locator interface. At the top, it says "Web of Science™ Reviewer Locator" with a search icon and "Search 5 Years of Publications". Below this is a link: "View full interactive search on reviewerlocator.webofscience.com".

Web of Science Reviewer Recognition Service

Publons partners with publishers so journals can provide a positive, rewarding, and memorable reviewing experience.

Publons can fully integrate into your submission system to automate the recognition process.

Reviewer profiles are instantly updated with verified records of reviews performed.

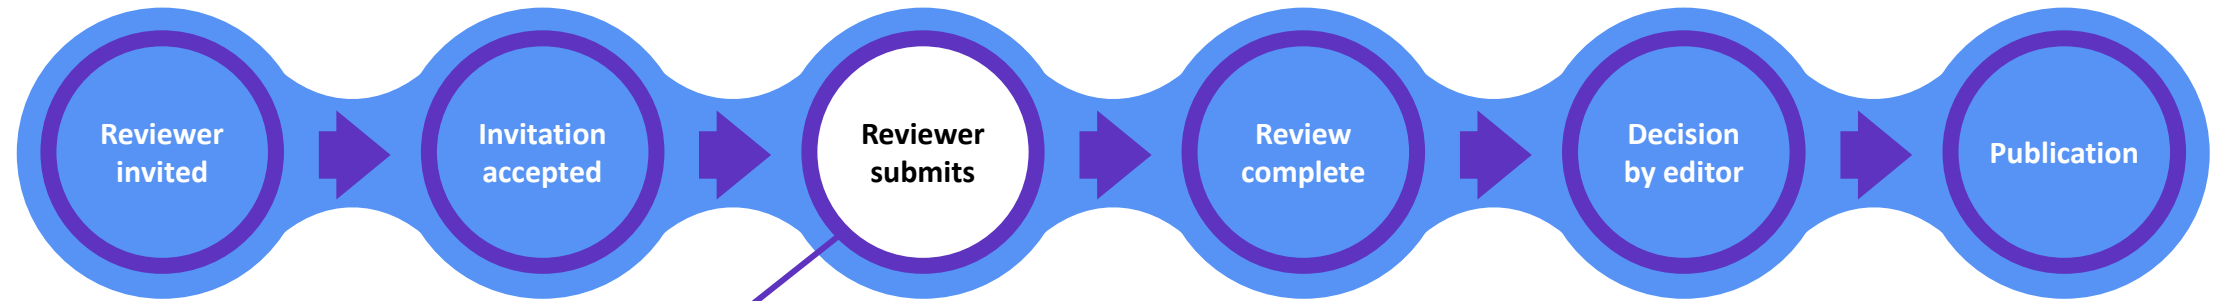

Use publisher-branded emails to notify your reviewers when the paper they reviewed is published and re-engage them with your content.

The publisher Partner Dashboard provides exclusive insights and tools to help you understand, and engage with reviewers.
